

Monkey CD30 ECD

Cat No.:	03-01-0316
Product Name:	Monkey CD30 ECD
Description:	CD30, also known as TNFRSF8, is a member of the tumor necrosis factor receptor family. Its interaction with ligands TNFSF8/CD30L may play a role in the regulation of cellular growth and transformation of activated lymphoblasts. It also regulates gene expression through activation of NF-kappa-B. CD30 is expressed by activated, but not by resting, T and B cells. CD30 is associated with anaplastic large cell lymphoma, expressed in embryonal carcinoma but not in seminoma and is thus a useful marker in distinguishing between these germ cell tumors. It also expressed on classical Hodgkin Lymphoma Reed-Sternberg cells.
Type:	Protein
Property:	Recombinant Protein
Source:	Recombinant protein purified from HEK 293 cell culture
Genbank No.:	XP_011725133 (aa.29-393)
Applications:	WB standard, antibody ELISA, immunogen, etc
Formulation:	Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).
Purity:	>95%

CAMBRIDGE BIO

Provider of Quality Products for Life Science

Protein:	Recombinant monkey CD30 extracellular domain protein (a.a. 29-393)(XP_011725133). This single-pass membrane protein is highly glycosylated, containing both N- and Oglycosylation. Thus, the protein M.W. looks much larger than predicted size with high
Storage:	For short term, store at 4°C, stable for 1 month. For long term storage, aliquot and freeze at -80 °C. Non-hazardous. No MSDS required
Limitation:	For research use only, not for use in diagnostic procedures.
