| Product Name: | Monkey CD352                                                                                                                       |
| Description:  | Triggers cytolytic activity only in natural killer cells (NK) expressing high surface densities of natural cytotoxicity receptors. |
| Type:         | Protein                                                                                                                            |
| Property:     | Recombinant Protein                                                                                                                |
| Source:       | HEK293                                                                                                                             |
| Genbank No.:  | XP_001117577 ( aa.20-225)                                                                                                          |
| Applications: | ELISA, WB, Immunogen                                                                                                               |
| Formulation:  | Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).                                                                    |
| Purity:       | >95%                                                                                                                               |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                                                         |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                                                       |
