| Product Name: | Mouse CD357-mIgG1                                                                                                                                                                                                                        |
| Description:  | Receptor for TNFSF18. Seems to be involved in interactions between activated T-lymphocytes and endothelial cells and in the regulation of T-cell receptor-mediated cell death. Mediated NF-kappa-B activation via the TRAF2/NIK pathway. |
| Type:         | Protein                                                                                                                                                                                                                                  |
| Property:     | Recombinant Protein                                                                                                                                                                                                                      |

| Genbank No.:  | O35714 ( aa.20-153)                                                                                                                                                                                                                      |
| Applications: | ELISA, WB, Immunogen                                                                                                                                                                                                                     |
| Formulation:  | Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).                                                                                                                                                                          |
| Purity:       | >95%                                                                                                                                                                                                                                     |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                                                                                                                                                               |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                                                                                                                                                             |
