

## Anti-human CD66a/c/e

|               |                                                             |
|---------------|-------------------------------------------------------------|
| Cat No.:      | 03-01-4484                                                  |
| Product Name: | Anti-human CD66a/c/e                                        |
| Description:  | Anti-human CD66a/c/e                                        |
| Type:         | Antibody                                                    |
| Source:       | Mouse monoclonal antibody, clone G10F5                      |
| Applications: | IF, IP, ELISA                                               |
| Formulation:  | 1mg/ml                                                      |
| Specificity:  | Human CD66a/c/e                                             |
| Purity:       | >95%                                                        |
| Storage:      | Store at -20°C,Avoid freeze / thaw cycle.                   |
| Limitation:   | For research use only,not for use in diagnostic procedures. |
