

## Anti-gp120(JRCSF)(B)

|               |                                                                                                                            |
|---------------|----------------------------------------------------------------------------------------------------------------------------|
| Cat No.:      | 01-01-3132                                                                                                                 |
| Product Name: | Anti-gp120(JRCSF)(B)                                                                                                       |
| Description:  | Anti-gp120(JRCSF)(B)                                                                                                       |
| Type:         | Antibody                                                                                                                   |
| Property:     | IgG1                                                                                                                       |
| Source:       | Mouse                                                                                                                      |
| Applications: | WB , ELISA , IP , IF                                                                                                       |
| Immunogen:    | Reacts with gp120/gp160(JRCSF)(B) ,and gp120(JRFL)(B) proteins only as tested. Minimal cross-reactivity to other subtypes. |
| Specificity:  | Some Clade B                                                                                                               |
| Purity:       | >95%                                                                                                                       |
| Storage:      | Store at -20°C ,Avoid freeze / thaw cycle.                                                                                 |
| Limitation:   | For research use only ,not for use in diagnostic procedures.                                                               |
