

## HA1(H1N1)(A/Albany/12/1951)

|               |                                                                                                    |
|---------------|----------------------------------------------------------------------------------------------------|
| Cat No.:      | 01-02-0315                                                                                         |
| Product Name: | HA1(H1N1)(A/Albany/12/1951)                                                                        |
| Description:  | HA1(H1N1)(A/Albany/12/1951)                                                                        |
| Type:         | Recombinant Protein                                                                                |
| Property:     | C-terminal 6xHis tagged HA1(A/Albany/12/1951(H1N1))<br>protein (a.a.18-345) (Genebank #: ABP49481) |
| Source:       | HEK293                                                                                             |
| Genbank No.:  | ABP49481                                                                                           |
| Applications: | WB standard, antibody ELISA, immunogen                                                             |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in<br>PBS(pH7.4).                               |
| Purity:       | >95%                                                                                               |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                         |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                       |
