| Cat No.:      | 01-02-0446                                                           |
| Type:         | Recombinant Protein                                                  |
| Property:     | Accession No. ABF17954    a.a.18-530                                 |
| Source:       | HEK293                                                               |
| Genbank No.:  | ABF17954                                                             |
| Applications: | WB standard, antibody ELISA, immunogen, etc                          |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in<br>PBS(pH7.4). |
| Purity:       | >95%                                                                 |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                           |
| Limitation:   | For research use only, not for use in diagnostic procedures.         |
