

## HA1(B/Massachusetts/2/2012)

|               |                                                                                            |
|---------------|--------------------------------------------------------------------------------------------|
| Cat No.:      | 01-02-0751                                                                                 |
| Product Name: | HA1(B/Massachusetts/2/2012)                                                                |
| Description:  | HA1(B/Massachusetts/2/2012)                                                                |
| Type:         | Recombinant Protein                                                                        |
| Property:     | C-terminal 6xHis tagged HA1(B/Massachusetts/2/2012)<br>(a.a.16-362) (Genbank No. AGL06036) |
| Source:       | HEK293                                                                                     |
| Genbank No.:  | AGL06036                                                                                   |
| Applications: | WB standard, antibody ELISA, immunogen                                                     |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in<br>PBS(pH7.4).                       |
| Purity:       | >95%                                                                                       |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                 |
| Limitation:   | For research use only, not for use in diagnostic procedures.                               |
