

## **E (DIII)(Zika)**

|               |                                                                   |
|---------------|-------------------------------------------------------------------|
| Cat No.:      | 01-09-0055                                                        |
| Product Name: | E (DIII)(Zika)                                                    |
| Description:  | E (DIII)(Zika)                                                    |
| Type:         | Protein                                                           |
| Property:     | Purified recombinant protein                                      |
| Source:       | HEK293                                                            |
| Genbank No.:  | NC_012532                                                         |
| Applications: | WB standard, Ab ELISA, immunogen, etc.                            |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in PBS(pH7.4). |
| Purity:       | >95%                                                              |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                        |
| Limitation:   | For research use only, not for use in diagnostic procedures.      |
