

## Anti-VP4 (HAV)

|               |                                                                                                  |
|---------------|--------------------------------------------------------------------------------------------------|
| Cat No.:      | 01-15-0129                                                                                       |
| Product Name: | Anti-VP4 (HAV)                                                                                   |
| Description:  | Anti-VP4 (HAV)                                                                                   |
| Type:         | IgG                                                                                              |
| Property:     | Rabbit Polyclonal Antibody                                                                       |
| Source:       | Rabbit                                                                                           |
| Applications: | WB, ELISA, IP, IF                                                                                |
| Formulation:  | Each vial contains 100 ug purified IgG in 100 ul PBS(1mg/ml) with 40% glycerol.                  |
| Immunogen:    | Hepatitis A virus VP4 protein (Genebank accession AAM08224)                                      |
| Specificity:  | Reacts with HAV VP4 and VP4 precursor proteins.<br>Cross-reactivity to other subtypes not tested |
| Purity:       | >95%                                                                                             |
| Storage:      | Store at -20°C, Avoid freeze / thaw cycle.                                                       |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                     |
