| Product Name: | Monkey LILRB3/CD85a                                                                                                                                                                                                                                                                                                                                                         |
| Description:  | Leukocyte immunoglobulin-like receptor subfamily B member 3(LILRB3) may act as receptor for class I MHC antigens, which Becomes activated upon coligation of LILRB3 and immune receptors, such as FCGR2B and the B-cell receptor. Down-regulates antigen-induced B-cell activation by recruiting phosphatases to its immunoreceptor tyrosine-based inhibitor motifs (ITIM). |
| Type:         | Protein                                                                                                                                                                                                                                                                                                                                                                     |
| Property:     | Protein                                                                                                                                                                                                                                                                                                                                                                     |
