

## gp120 (CNE12)

|               |                                                              |
|---------------|--------------------------------------------------------------|
| Cat No.:      | 01-01-1072                                                   |
| Product Name: | gp120 (CNE12)                                                |
| Description:  | gp120 (CNE12)                                                |
| Type:         | Protein                                                      |
| Property:     | Protein                                                      |
| Origin:       | China                                                        |
| Source:       | HEK293                                                       |
| Genbank No.:  | ADI62512.1                                                   |
| Applications: | WB ,ELISA ,Immunogen                                         |
| Purity:       | >95%                                                         |
| Storage:      | Store at -80°C ,Avoid freeze / thaw cycle.                   |
| Limitation:   | For research use only ,not for use in diagnostic procedures. |
| Note:         | Clade B'                                                     |
